

Today, I'm working for Nuevas Esperanzas in Nicaragua

One day to make a difference...

www.nuevasesperanzas.org

One day to make a difference...

Giving one day's salary can help:

- **save a family from walking for four hours to collect water every day**
(by investing in a rainwater harvesting system to collect and store rainwater from roofs)
- **save a forest from slash and burn farming**
(by training local farmers in sustainable alternatives such as beekeeping and fruit production)
- **save a community from drinking water contaminated by arsenic**
(by measuring arsenic levels in rural water supplies and developing arsenic-free water sources)
- **save a child from dying from preventable disease**
(by supporting our work in health advocacy to make basic healthcare accessible to all)
